The **Webmaster Center** is your hub for building and managing your district or school website. All of the tools have been organized to place the maximum amount of information at your fingertips while maintaining an efficient work flow. The Navigation Manager, a list of open pages, and items awaiting your approval (if any) are on the left. The Content Manager with all its tools for adding news, notes and events to the homepage along with your image albums and resource locker are on the right.
Once you work your way into a section, you'll find all your tools for creating and organizing pages, sub sections, and image albums. You can also assign editors and contributor rights to other users.
